

CROSSWALK SAFETY

A pedestrian is injured every seven minutes walking near traffic. It's a driver's responsibility to keep roadways and crosswalks safe for all pedestrians. Follow these crosswalk safety tips to help prevent an accident involving a pedestrian in your area.

4 Rules for Crosswalks

-  **Stay alert**
When driving, always be prepared to stop and looking out for pedestrians, cyclists, or skateboarders.
-  **Come to a complete stop**
At a red light, come to a complete stop, making sure you are behind the line and watch for pedestrians.
-  **Wait for pedestrians**
If pedestrians or cyclists are crossing, wait until they have crossed at least one lane past the one you are in.
-  **Never pass**
If a vehicle is stopped or slowing down at an intersection or crosswalk, stay behind them and wait.
